

M. A. MURAD

Software Engineer | MS/PhD Applicant in Cloud Systems

masrukahmedmurad@gmail.com

Dhaka, Bangladesh

+8801750768076

LinkedIn, GitHub, Google Scholar, Portfolio

Software engineer with 2+ years of backend experience in production enterprise systems (Odoo ERP, PostgreSQL, Python, Django) and a co-author of an IEEE-published machine learning paper. My research focus is AI-enabled observability for microservices, specifically anomaly detection and root cause localization when traces, logs, or metrics are incomplete. I am applying for an MS position with research funding to extend this work toward reliable and secure cloud systems.

Research Interests

AI-enabled observability and AIOps · Anomaly detection and root cause localization in microservices · Robust multimodal learning under missing telemetry (traces, logs, metrics) · Cloud and kernel-level security · Edge computing

Education

Daffodil International University | Bachelor of Science

2021 – 2025

Computing & Information System

GPA: 3.61 / 4.0

Thesis : FS-RFE: A Hybrid Feature Selection and Attention-Based LSTM Framework for Exploring Neurodysfunction Risk in Dementia Diseases

Research Experience

Incomplete Multimodal Observability for Microservice RCA (ongoing, independent)

Investigating anomaly detection and root cause localization when traces, logs or metrics are structurally or transiently missing, a setting that existing methods (Eadro, DeepHunt, UniSage) assume away.

Publications & Presentations

Poster & Short Paper | EBISION 2026, South Korea

July 2026

O. B. K. Bhuiyan, S.-H. Choi, **M. A. Murad**, M. T. I. Refat, and K.-W. Park, "SparseRank: Explainable Cost-Aware Feature Selection for Anomaly Detection in E-Commerce Microservices," poster presented at EBISION 2026 (2-page short paper in online proceedings)

Conference Paper | IEEE

December 2025

S. Akter, **M. A. Murad**, M. F. Hosen, F. T. Johora, and T. Sultana, "Bioinformatics and Machine Learning Approaches for Identifying Hub Genes and Therapeutic Targets in Alzheimer's and Parkinson's Diseases," in Proc. 28th Int. Conf.

Computer and Information Technology (ICCIT), Cox's Bazar, Bangladesh, Dec. 19-21, 2025. IEEE.

doi: 10.1109/ICCIT68739.2025.11490328.

Professional Experience

Research Assistant · Centre for Advanced Machine Learning & Applications (CAMLAs) October 2024 – January 2025

Pre-processed high-dimensional genomic data and applied ML/DL dimensionality reduction, followed by differential gene expression and enrichment analysis.

Junior Software Engineer (ERP Team) · Unisoft Systems Ltd. · Dhaka, Bangladesh

January 2025 – October 2026

Developed and maintained custom Odoo modules (Python, XML, JavaScript) for sales, purchase, accounting, and inventory workflows, and debugged and optimized PostgreSQL queries for large manufacturing, trading, and financial services clients.

Trainee Software Engineer • Mindsynth Technologies • Banani, Dhaka, Bangladesh February 2024 – August 2024

Worked on Odoo custom development and configuration, and on R&D for scalable ERP solutions.

Skills

Research Skills: Research Paper Reading, Research Gap Findings, Critical Thinking, Experimental Design

Technical Skills: Cloud Computing, Microservices, Observability, Python, R, Bio embedding, Odoo ERP, PostgreSQL, MySQL, Git, Feature Engineering, Machine Learning, Deep Learning, LaTeX

Languages: English, Bangla

Projects

Decentralized Voting DApp (Solidity/Hardhat, Ethereum Sepolia): Designed and deployed a smart-contract voting application on the Testnet with a web frontend, exploring tamper-resistant and transparent record-keeping. | [Link](#)

Beneficiary Document Automation (Islamic Relief Bangladesh) Using JavaScript, Python, HTML, Excel | [Link](#)

Certifications

Foundations of Cybersecurity | Google (via Coursera)

July 2023

Volunteering & Leadership Experience

Islamic Relief Bangladesh | Baridhara Dhaka-1212, Bangladesh

March 2022 – September 2023

Volunteer at Humanitarian and Resilience Program

Built a web tool (JavaScript, Python) that automated conversion of large beneficiary Excel datasets into multiple PDF formats, cutting manual effort by 50%.

Good Neighbors Bangladesh | Swadesh Shornally Abashan, Khilkhet, Dhaka, Bangladesh

October 2020 – April 2021

Volunteer Facilitator | (Community Development Project)

Facilitated and managed community development programs supporting over 1,500 children across designated Good Neighbors Bangladesh Community Development Program.
